➔ GAME RULES

A) GENERAL

The game is divided into 3 zones, each containing 4 race levels. For each level, you will be able to choose between various game modes:

- Training Mode
- Lums Mode
- Championship Mode
- Target Mode
- Time Attack Mode

At the beginning, only zone 0 is available. You will subsequently be able to access the following levels: Training Mode, Championship Mode, and Time Attack Mode.

The Lums Mode & Target Mode are unlocked automatically when you achieve enough victories in the different levels. The Championship Mode unlocks Lums Mode levels; the Lums Mode unlocks the Target Mode levels. You will be informed each time a new feature becomes available.

B) GAME MODE DESCRIPTIONS

■ Training Mode (Only in Single-Player)

This mode familiarizes you with the levels and allows you to practice and master the game controls and tricks before the real challenge begins. Please note that only the first 4 levels are available at the beginning of the game.

■ Championship Mode (Only in Single-Player)

In Championship Mode, you will compete with a computer-controlled character. You have to finish 3 laps first to win. One victory in Championship Mode unlocks the similar level in Lums Mode; one victory in Lums Mode unlocks the similar level in Target Mode.

■ **Time Attack Mode (Only in Single-Player)**
Create the fastest lap record of the level!

You will run one lap on your own. The aim is to reach the next checkpoint before the timer reaches 0. If you can break the best lap time, your record will be saved into your profile.

■ **Lums Mode (Only in Single-Player)**

Only available once the corresponding level has been unlocked in Championship Mode.

In this mode, many lums are spread around the maps. You must compete with a computer-controlled character and win the 3-lap race. At the same time, collect as many lums as possible.

- ⇒ If you win, the corresponding level will be unlocked in the Target Mode.
- ⇒ Depending on the number of lums you collect, you will win a time bonus for Target Mode.

➡ **PLAY IN SINGLE-PLAYER OR MULTIPLAYER**

NOTE: The Single-Player Game determines the way you progress through the game: your achievements in this mode will unlock levels, rewards & characters. In a Multiplayer Game, you can access the levels you have already unlocked in a Single-Player Game only.

A) RAYMAN RUSH CHARACTERS

➡ **Character Descriptions**

■ **Rayman:**

Although Rayman has no sleeves, he sure has plenty of tricks! Known for his heroism while protecting his friends, the "limbless wonder" forgets the meaning of friendship the minute he steps into the arena of competition. This is his turf, and he's fiercely competitive when it comes to staying on top.

■ **Globox:**

Had to overcome his timidness and fear (maybe he's had therapy?) to take part in this competition. While he might appear a bit awkward and clumsy, that oversized body hides a definite dexterity and fighting spirit.

■ **Razor Beard:**

Always angry, irritable, and mean. What he lacks in size, he makes up for in spite, making him a master of shots below the belt, which he likes more than anything else.

■ **Henchman 800:** A robot pirate's life is simple: be the best, waste others, beat them to a pulp if necessary, have no mercy...

Be tough enough and unlock the hidden characters....

■ **Mrs. Razorbeard:** Her more refined and fashionable appearance (sunglasses, dress, etc.) thinly veils the same traits as her horrible husband, only worse...

■ **Tily:** A slight, fragile and impish little fairy... until the race starts...

■ **Henchman 1000:** An older version of the robot pirate, more distinguished, but with the same values as Henchman 800: win, waste others...

■ **Globette:** As shy as her friend, she is yet a fierce competitor when it comes to racing. Globox himself is never sure he can defeat his beloved friend.

⇒ Character Selection

At the beginning, only 4 characters are available. The 4 hidden characters will be unlocked as you evolve in the game. In the Single-Player Game, use the directional buttons or the left analog stick to highlight your character selection and press the \times button to validate your choice. In the Multiplayer Game, Player 2 presses the \times button to join the game.

B) SINGLE-PLAYER GAME

Play on your own and improve your mastery of the environment to become faster and faster. In the main menu, select the Single-Player Game with the directional buttons or the left analog stick. Your selection will be highlighted. Press the \times button to confirm your choice. Press the \triangle button to return.

⇒ Map Selection

To move from one zone to another, press the L1 button to move left and the R1 button to move right. Select your level with the left analog stick pressed left and validate by pressing the \times button. You can now choose your game mode.

⇒ Game Mode Selection

You can choose between: Training Mode, Championship Mode, and Time Attack Mode. Select your mode with the LEFT/RIGHT directional buttons or the left analog stick.

Your selection is highlighted. Press the \times button to validate your choice.

C) MULTIPLAYER

⇒ General

In the Multiplayer Game, challenge one friend in a 1, 3 or 5-lap race. Initially, only four levels in Zone 0 are available. Use your experience and knowledge of the environment! In the Multiplayer Game, only 2 players can play simultaneously.

Note: Player 1 controls menu navigation and confirms by pressing the \times button.

⇒ Level Settings

You can determine the victory settings with the left analog stick.

- Select the number of laps required to win: 1 / 3 / 5

Validate by pressing the \times button.
